

Our Mission Statement – the reason our College exists

“Learning & Growing in the Light of the Gospel”

With Christ at the centre of our learning, we:

- *Help young people to achieve their greatest potential*
- *Guide their intellectual growth, nurture their God-given talents, and inspire them to live in service to others*
- *Aim to develop honest, confident, responsible and compassionate members of society, based on the educational values of Blessed Antonio Rosmini*

Our Vision Statement – the long-term change resulting from our work

“Strength of Mind, Strength of Values, Strength of Purpose”

Strength of Mind

We aim to enable our students to be truly independent thinkers and to think ‘big’ ideas, using their creative instincts. We aim to empower our students to develop resilience through a growth mind set adopting a ‘not yet....’ rather than a ‘can’t do....’ attitude to their learning and their personal development. We aim to develop young people to become critical thinkers with the capacity for original thought and ideas. We aim to cultivate young minds to accept and welcome failure as a natural part of self-improvement and personal growth – how can we know how to improve unless we first fail?

Strength of Values

Ratcliffe College’s educational ethos and Christian values are emphasised by a strong sense of moral purpose and commitment to doing what is right for children and young people. With Christ at the centre of our learning, we educate young people to live their lives based on the Gospel Values; faithfulness and integrity, dignity and compassion, humility and gentleness, truth and justice, forgiveness and mercy, tolerance and peace, service and sacrifice.

As Christians, we hear the call of the Gospel to seek perfection by loving God and others with all our strength, anchored by our School motto, *Legis Plenitudo Charitas*: ‘Love is the fulfilment of the Law’. We aim to educate young people to see Christ in others and to help those less fortunate than themselves or those in need. As a through school with children from 3 to 18, we aim to instil a deep sense of community and belonging to the Ratcliffe College family of Schools: Nursery, Preparatory and Senior.

Strength of Purpose

Finally, we aim to educate young people to have a strong sense of who they are and their purpose in the world. We aim to inspire our young people to become the leaders of the future. Our aim is to nurture the God-given talents of every student, whether academic or part of the co-curriculum, so that they achieve their greatest potential and are equipped academically, socially, emotionally and spiritually to go forth and make a positive difference to the communities in which they live and work

FIRST AID AND MEDICAL ARRANGEMENTS POLICY

ARRANGEMENTS:

1. Medical Centre – general information
- confidentiality
2. Day pupils' illnesses
3. Boarders
4. Medication
5. Asthma
6. Sports injury
7. Head injuries and Concussion
8. Serious Medical conditions
9. Severe allergic conditions
10. Meningitis and Tuberculosis
11. Head lice
12. Automated External Defibrillator (AED)
13. First Aid Bags
14. Alternative/Chinese Medication

MEDICAL ARRANGEMENTS

Policy on Medical Arrangements at Ratcliffe College

Policy

This policy is to ensure that adequate medical arrangements are provided for pupils and staff on the College's premises. It also extends to out-of-school activities, particularly sports fixtures.

Legislation/Guidance

The arrangements set out below have been guided by the various regulations but, more particularly, by the schools' own registered nursing staff. Through this informed discussion a system of "best practice" has been established reflecting the needs of the College.

Organisation

Certain key members of staff are responsible for managing our medical policy. These key personnel are as follows:

- a. Medical Officer.
- b. Nursing Sisters.

- c. First Aiders.
- d. Health & Safety Officer.

The responsibilities of these personnel are:

- a. **Medical Officer:** Is Doctor Tim Jennings, The County Practice Syston, GP for the boarders, but in an emergency will also treat day students.
- b. **Nursing Sisters:** Are primarily responsible for the administration of the Medical Arrangements at the College. They would administer any medication required by students or staff within their areas of authority and responsibility. They would also be involved in arranging any secondary treatment at hospital or surgery, particularly for the boarders. Boarding staff, (those not specifically first aid trained), are given guidance from the Nursing Sisters.
- c. **First Aiders:** Support the Nursing Sisters as far as they were able and within their areas of competence and training.
- d. **Health & Safety Officer:** Is responsible for the regular, on-going review of the arrangements, providing support and advice as appropriate and within his level of training and competence.

Arrangements

1 Medical Centre - General Information

1.1 Location:

The Medical Centre is situated in the main School Building on the Ground Floor corridor near to the Refectory.

Internal Telephone	2029
Daytime Mobile	07432 566517
Out of Hours Mobile	07432 566911

The Nursing Sisters are Debra Warburton and Helen Bogwandos & Caroline Lang

The Medical Centre is staffed during term time on Monday to Friday from 8.00am - 6.30pm, and Saturday for sports fixtures. The Sisters operate an on-call rota for out of hours' emergencies.

The Medical Officer is Dr. Tim Jennings from the Health Centre in Syston. Details of his visiting times and how to contact him are shown at 3.3 and 3.4.

The first aiders who hold current certificates are listed on noticeboards around the school as are those staff who are AED trained.

EYFS – All Nursery staff have a current paediatric first aid certificate.

1.2 Confidentiality:

To avoid any possible confusion in the care of our students (and if, appropriate, our staff), and to ensure that accurate information is appropriately shared, it is deemed wise to adhere to a policy on the sharing of confidential information with the Medical Department.

In accordance with professional obligations medical information about pupils, regardless of their age, will remain confidential. However, in providing medical care for a student, it is recognised that on occasions the doctor or nurse may liaise with the parents or guardians, the Headmaster or other academic and house staff, and that information, ideally with the student's prior consent, will be passed on as appropriate. With all matters, the doctor or nurse will respect a student's confidence except on the very rare occasions when, having failed to persuade a student, or his or her representative, to give consent to divulgence, the doctor or nurse considers it in the student's better interests, or necessary for the protection of the wider school community, to breach confidence and pass information to a relevant person or body.

All staff should be mindful of the fact that behavioural issues within and outside the classroom environment are often related to emotional needs. Such emotional needs may also be triggered by a child's physical well-being, such as a chemical imbalance.

Similarly, a distressed child may present himself/herself to the Medical Department with related physical / emotional ill-health.

Where it is deemed helpful, the Headmaster, Senior Deputy Head, Deputy Head Pastoral or Assistant Head may request a team approach whereby relevant staff attend a 'case conference' to address the needs of any given child.

Appropriate staff may include the Headmaster, Senior Deputy Head, Deputy Head Pastoral, Assistant Head, Learning Support, Medical, Chaplaincy, Senior Housemaster/Housemistress, Head of Year and Tutor.

All relevant parties would then be present to hear and share information at first-hand, contribute their own experiences with, and knowledge about, the child, and offer their professional guidance so that a comprehensive picture might be built, and the best outcome reached. This may in turn lead to referrals to the primary healthcare team if necessary.

CAMHS and educational psychologists welcome such liaison with school nurses, the school doctor and teaching staff in implementing care strategies for the child at school.

Staff Medical File - To assist all teaching staff perform their duties professionally and with the utmost care for the students, information regarding students with medical conditions are kept within a Medical File, which is accessible to all staff. This file is kept within a locked safe in the Senior School Staff Common Room. A further copy resides in the Preparatory School and another copy securely stored in the Nursery. The code for the safe is changed every half-term and only teaching staff are given the code. All teaching staff are requested to access the Medical File to familiarise themselves with the medical conditions of the children they teach. Staff must sign and date a form to demonstrate they have done this at the start of each academic year. Staff are reminded never to divulge this information to others or to record the child's condition anywhere else in written or electronic form. They are encouraged to seek advice from the medical nurses if they have any concerns about how to manage an episode involving a particular child. The Medical Department regularly updates the file as parent's complete data collection forms and then they alert colleagues to these changes.

2 Day students' illness

If a student is unwell during a lesson, the member of staff will encourage the pupil to visit the medical centre at the lesson change or break. In the Prep School, they will be encouraged to wait until the Prep School lunchtime, or a call will be made to the medical centre. If the student is unable to wait, if possible Sister will come to the Prep School, if not then a member of staff may escort them to the Medical Centre. In the event of an emergency the duty Sister will come to the classroom. If a student is unwell and should not remain at school, Sister will arrange for the parents to be informed and asked to collect their child from the Medical Centre. In the Prep School, a First aider is available to be the first response at lunchtime play to avoid having to cross the road unnecessarily. When possible, Sister will come to the Prep School to deliver necessary treatment. If they feel further medical assistance is required, they will contact the Medical Department via the Prep School Reception.

No student may leave school for reasons of ill health without Sister's knowledge.

If a student is sent home by the Medical Department then the Sister on duty notifies Registration, Head of Year, form tutor and (if appropriate) Senior Housemaster/Housemistress.

2.1 Emergencies to Casualty

Sister will decide if casualty treatment is needed. In an emergency Sister will take responsibility for calling an ambulance and inform the Administration office of this.

Sister will arrange for Parents to be informed if their child has been involved in a serious accident.

Boarders: A member of staff will accompany them to hospital.
The Head of Boys'/Girls' Boarding will be informed.
Parents will be informed by Boarding staff or Sister.

Day pupils: If a minor injury, parents will be asked to collect and take the student to casualty.

If a serious injury or if parents are unavailable, a member of staff will take the student to casualty and be responsible for the student until parents arrive.

Sister should, remain in school at all times unless she decides it is necessary for her to accompany a student to hospital. Should this be necessary, the Administration Office will be made aware of the matter.

Providers must notify local child protection agencies of any serious accident or injury to, or the death of, any child while in their care, and must act on any advice from those agencies.

2.2 Letters re. absence from sport

All letters re. absence from sport (Years 7-10) are to be handed to a member of the Medical Department. The Sister on duty will write a note to the Director of Sport to indicate whether the student is off games or on limited activities. For Years 11-13 the students speak to the sports staff at 1330.

Boarders: - If a boarder has been at home when a medical condition has arisen, they are required to bring a letter from their parents or ask their parent to telephone Sister if they wish their child to be excused from sport.

Day students: If a day student needs to be excused games, they must bring a letter from home and hand it to a member of the Medical Department.

If a medical condition arises at school leading to a student being unable to take part in P.E, Games or Swimming, the Sister may write a note to the Director of Sport to excuse the student from the activity.

If a student needs to be excused from games long term, a Doctor's letter handed to the Medical Department will be necessary; the Medical Department will, in turn, notify the Director of Sport.

Long-term permission will normally need to be renewed every half term unless the parents and a member of the Medical Department have agreed otherwise.

3 Boarders

The Sister is available for Boarders throughout the day in line with the working hours outlined in section 1.1 above.

In the evenings and overnight, Boarders **must see** their duty boarding staff for matters concerning illness. Boarding staff will contact the Duty Sister on her mobile for advice or to request attendance to a boarder.

3.1 Boarders Illness

If a Boarder feels unable to attend school due to medical reasons, they **must** report to Sister at 8.00am. Depending on their age and medical condition, they will then, if 'off school', either remain in the Medical Centre until discharged by Sister or return to their study/bedroom.

Before going off duty in the evening, the duty Sister will liaise with the Boarding staff to arrange the necessary care that is required whilst she is off duty.

Food/drinks will be taken in the Medical Centre by collection of food from the Refectory by Sister or other member of staff.

3.2 Management plan for Boarders who are ill and require to be confined to their bedrooms

This applies to boarders who have a mild sickness or injury that requires them to be confined to bed. Senior boarding staff or nurses will refer more serious cases to visiting doctors or the hospital.

Parents are kept regularly informed of the progress of their child and the opportunity is given for the child to recuperate at home if this is feasible.

A student is only confined to bed after consultation with nursing staff.

Whenever possible a student who requires bed rest is, subject to availability, looked after in the medical centre by the medical staff until the end of their working day. In

other situations, and outside of working hours, the student is in his/her own room and is checked by boarding staff/medical staff at a frequency agreed with medical staff.

Medical staff telephone numbers are displayed in the Staff Common Room and one nurse is on call when the medical centre is not manned. Boarding staff must call for assistance if they feel it appropriate.

If a sick student shares a room, provision is made for the sick student to have exclusive use of a bedroom. Each boarding has a designated medical room.

If the sickness involves frequent use of a toilet or shower, arrangements are made to locate a sick student adjacent to these facilities. This is in the medical centre until the end of the working day, and in a suitable room in the boarding area after this time.

If the illness involves vomiting or diarrhoea, boarding staff assign and clearly mark a specific toilet/shower for the exclusive use of that student. This is in the medical centre during working hours and in a suitable room in the boarding area after this time. House staff are advised of the situation so that a change of bedding is available should it be required, and the toilet/ shower/ bath is regularly inspected, disinfected and cleaned.

Where a sick student may need attention overnight, boarding staff agree with nurses an action plan, which may include regular visits through the night or the provision of a mobile phone so that boarding staff can be contacted.

3.3 Management plan for boarding students in the event of an epidemic

If it becomes clear that an epidemic is possible, normally by several cases developing during a short period or on the advice of nursing staff, boarding staff, working with the medical staff, make available a corridor of single rooms with the provision of a nearby toilet/shower.

The area is clearly identified by notices on corridor doors that this is an area strictly for those who are ill, and that in all other situations the area is out of bounds.

Additional measures may be taken to prevent the spread of infection by ensuring that appropriate additional cleaning and hygiene measures are taken.

In liaison with the Catering Department, nursing staff will suggest appropriate meals and liquid intake and where the meals should be taken.

A member of the boarding or nursing staff will be assigned specific duties on the regularity of visits to ensure that the situation is monitored, day and night. These arrangements may include the provision of extra cleaning duties so that toilets/showers can be kept clean and hygienic. The medical centre holds a supply of disposable aprons, masks, gloves, and hand wash for situations such as this; nursing staff give advice as to whether the wearing of this apparel is appropriate.

Contaminated material is stored in appropriately marked bags or containers and disposed of under the supervision of medical staff.

At the end of a period of sickness or epidemic, rooms that have been used by sick students are thoroughly cleaned, surfaces wiped and bedding aired and changed. Beds are washed down with disinfectant.

All laundry, both during and at the end of a sickness, is kept in separate clearly marked laundry bags so that laundry staff can take the appropriate action to ensure that it is properly disinfected and cleaned.

3.4 Appointments for Boarders

Parents are asked to arrange routine optician and/or dental appointments to coincide with School holidays and half term breaks to minimise disruption to academic work. Parents/Guardians of students coming from abroad, who are in the process of having orthodontic treatment, should make their own arrangements before arriving in this country to have the treatment continued while in the UK.

‘Emergency’ visits (e.g. in case of injury or acute conditions) – The School provides transport (including appointments to The Heath Centre in Syston). Depending on circumstances, transport may be via ambulance, or in a vehicle driven by any appropriate member of staff.

‘Follow up’ appointments – these are the responsibility of parent/guardian. However, the School may be able to provide transport, but the cost will be passed onto the parents.

‘Routine’ appointments – As ‘follow up’ appointments.

Visits to boarders as in-patients – The school will exercise a duty of care in escorting a boarder to hospital and will remain with the boarder until their appointed guardian arrives. It is expected that the guardian will then assume responsibility for the care of the child for the duration of their hospital stay.

3.5 Medical Officer

The School Medical Officer is Dr. Tim Jennings from The County Practice in Syston. Should a Boarder be ill and need to see the Doctor, Sister will arrange for them to be seen at the Health Centre or for the Doctor to see them at school if their condition dictates this. The Sister will also arrange for appointments with a female Doctor when requested.

In Dr. Jennings’ absence cover is provided by one of his colleagues from the practice.

Boarders under 16 will normally be accompanied by Sister when seeing the Doctor if requested by the Boarder or their parents.

A member of the Boarding Staff may be present. The students' right to see the Doctor in confidence will always be respected. Boarders over 16 will normally have a private consultation with the Doctor.

3.6 Registration

All full time Boarders must register with Dr. Jennings. They **must** have a school medical file completed and signed by their parent/guardian.

Should they need to see a Doctor in the school holidays Boarders should register as a temporary resident patient with their local Doctor.

Day and Boarding students' medical notes and information are kept securely in the Medical department. The Sister and Doctor are the only staff with access to these records.

Medical cards are to be given to Sister on starting as a Boarder and will be kept in the Medical Centre and are to be collected by the Boarders on leaving boarding. These can quite often arrive in the post directly to the boarders – boarding staff to ensure they are handed in to the Medical Centre.

3.7 Medicals

Sister will carry out medicals during the first few weeks of a new term and register all new full time boarders with the Syston Health Centre.

The medical will include:

- Record height/weight/blood pressure
- test routine urine sample
- fill out forms needed to register with the Doctor
- discuss any health worries

Sister will inform parents if there are any specific medical needs arising from the medical examination or any further appointments.

3.8 Prescriptions

Any boarder requiring a prescription should inform Sister who will arrange for it to be collected.

4 Medication Policy

A stock of over-the-counter medication and analgesia is kept in a locked cupboard in the surgery and a locked drawer in the Prep School.

Sister will give medication at her discretion unless otherwise stated by parents of the child. A record of all medication administered to students is kept by Sister.

If a student needs to take medication during the school day this must be handed into the medical department.

It should be in its original packaging. For the medical staff to be able to administer the medication, a form needs to be completed by a parent/guardian in the medical department or a note should be sent explaining who it is for, the dose & time it is needed and the reason it is being taken.

Students with asthma, who need to take an inhaler, can carry this with them. We ask that a spare inhaler be provided, to be kept in the medical department in the event of it being misplaced/run out.

If a student is prescribed an Epipen for a severe allergy, a form is required to be completed by a parent/guardian. The Epipen is then kept in the medical department.

No Boarder may have medication in their room unless authorised by Sister. It should not be shared with another student. A self-medication form is completed by Sister, Student and Boarding Staff and a copy is kept in the student's file and in the boarding house.

Only appointed members of boarding and medical staff, or those teaching staff specifically given written permission by the student's parents, e.g. when escorting students on trips, are allowed to give medication to a student.

If a student needs to have medication regularly administered by Sister during the school day this will be discussed with the parents and a Doctor's note may be required.

4.1 Staff taking medication/other substances

Staff must not be under the influence of alcohol or any other substance which may affect their ability to care for children. If practitioners are taking medication which may affect their ability to care for children, those practitioners should seek medical advice.

Line managers must ensure that staff only work directly with children if medical advice confirms that the medication is unlikely to impair that staff member's ability to look after children properly.

Staff medication on the premises must be securely stored, and out of reach of children, at all times.

4.2 'Out of hours' medicines for Boarders

If a Boarder feels unwell during any time that Sister is not on duty they should see the duty member of Boarding Staff.

The Girls' and Boys' Boarding Houses both have a locked medicine cupboard from which the Boarding Staff can administer over the counter medicines. A log/record of any medicine administered is kept, and Sister informed of any boarder's illness or need for medication on her return.

Sister will liaise with the Boarding staff regularly regarding sick boarders whilst paying attention to each boarder's confidentiality; (however the boarder's health and well-being are paramount).

Senior or Assistant Housemaster/Housemistress check with Sister at supper time about anyone who has been ill during the day and therefore any aftercare/medication needs once Sister has gone, until 8.00am the following morning, or over the weekend. Sister will also add any notes to the confidential boarding diaries.

Sisters are available for advice 'out of hours' and can be contacted at any time. The Boarding staff have the necessary contact numbers.

In emergencies the 'on call' Doctor must be called (in liaison with the Duty Sister on call) or an ambulance.

The 'on call' Doctor is contacted by dialling the Syston Health Centre on 01162 950500 and following the instructions on the recorded message (in liaison with the Duty Sister on call).

4.2 Vaccination Programme

In Year 8, all students are offered a HPV vaccination programme and this is co-ordinated in line with the community nurses and Sister.

Flu vaccines are also offered to all Senior and Prep School pupils in the Autumn Term.

The booster injection for Diphtheria, Tetanus and Polio is offered for all students when they reach the age of 15.

Vaccinations are only given to students who have returned a completed consent form.

5 Asthma

Students are responsible for taking inhaler medication as prescribed and for always keeping an inhaler with them. A list of students who are known to have severe asthma will be available for staff in the staff room, in the red medical file which is kept securely in the safe. Parents are required to provide the School with a spare inhaler which can be used in the event of an asthma attack if the original has been miss-placed.

All school staff will let the students take their own inhaler when they need to.

Students with asthma will be encouraged to participate in all sporting activities unless stated otherwise by their Doctor, Parents or Sister.

The following procedure is to be used in the event of an asthma attack: -

- 1) ensure that the reliever inhaler is taken immediately
- 2) stay calm and reassure the child
- 3) help the child to breathe by ensuring tight clothing is loosened
- 4) inform Sister
- 5) Sister will decide if GP or ambulance should be called
- 6) Sister will inform parents.

6 Sports Injury

Students must be fit to play sports.

Students wearing plaster casts may not participate in fixtures. The duty Sister can advise the student and member of staff on appropriate alternative means of exercise.

For Away fixtures, each Sports coach collects a first aid bag for their team from the Staff Room before going to all fixtures. The coach is to ensure that it is taken to the fixture and returned to the Medical Centre. The Medical Centre are responsible for ensuring that first aid kits are fully stocked.

For Home fixtures, the duty Sister provides each sports team with a first aid kit. The staff member responsible for the group is to ensure that it is taken to the game and returned to the Medical Centre. The Medical Department are responsible for ensuring that first aid kits are fully stocked.

At least one Sister is on duty for all Home Sports fixtures on Saturdays and for 1st and 2nd XV Rugby fixtures on weekdays. There is a paramedic at school to cover Saturday Rugby fixtures.

Sister will assess the injuries and decide what treatment is necessary.

Sister will decide if she or a member of staff needs to accompany a student to casualty in the ambulance if a parent is not available.

Sister will make sure there is adequate first aid cover if she leaves the site.

The injury will be fully documented, and an accident form filled in.

Sister will contact the relevant school to follow up injuries to students from opposition teams.

If a student is injured during a Sports lesson the student is sent to the Medical Centre. If necessary, they will be accompanied by another student or, the member of staff will telephone the Medical Centre to for advice and alternative arrangements.

If injured during a Sports lesson or fixture the Medical Centre will tell the student to report to the duty Sister, the following day to have the condition reviewed.

7 Head Injuries and Concussion

All students who sustain a head injury should be seen by Sister.

Sister will arrange for a letter and advice sheet to be sent home with all students after a minor head injury.

If a student has a minor head injury during games or a sports fixture and they are up immediately and playing the coach may allow play to continue. If in doubt the student will be seen by the duty Sister.

If the student is confused and disorientated for 10 seconds or more, they should be seen by the duty Sister who may refer them to casualty and tell the student to refrain from sport for 1 week.

If a student sustains a head injury in two separate episodes during the same game, they should refrain from sport for 4 weeks.

Students with a severe head injury having been seen in casualty must refrain from sport for 3 weeks.

Symptoms of concussion can persist or re-occur and if so, the student should be re-assessed by Sister.

A player is at further risk of sustaining greater injury after a blow to the head; (Second Impact Syndrome).

Head injuries sustained during rugby practice or fixtures will be treated in accordance with the RFU guidelines, copies of which are sent to parents together with a cover letter explaining the School's position in the event of a head injury. Any student who receives concussion must delay their return to full fixtures following a managed 23-day rehabilitation process, which includes a visit to their GP. It is the responsibility of each player and their family/guardian to inform the School if they have received concussion whilst playing for a club or during a representative match and vice versa.

8 Serious Medical Conditions

A confidential list of students with known chronic medical conditions is available to staff and is situated in the following places: -

- Staff Common Room – in the confidential medical file
- Medical Centre
- Preparatory School– in the confidential medical file
- Nursery School – in the confidential medical file
- In each Boarding House

9 Severe Allergic Reaction

A confidential list of students who are known to have severe allergic reactions will be available to Staff in the Staff Common Room, in the red medical file.

For those students whose allergic reaction is likely to be life threatening, Sister will make available to all staff who teaches them the necessary details to enable them to deal confidently a situation that may arise. They will be required to indicate that they have read them.

If any students with severe allergies are prescribed an Antihistamine or Adrenaline pen for use in emergencies, these are stored in the medical department. Parents must arrange for clearly named spares to be given to Sister at the beginning of each academic year.

In the event of a student having a severe allergic reaction, the following procedure is to be followed: -

1. Ensure that the Antihistamine or Adrenaline pen is administered.
2. Call for medical assistance.
3. Be prepared to resuscitate if necessary.

10 Meningitis and Tuberculosis

If a student or member of staff is diagnosed with Meningitis or Tuberculosis, the following procedures will be followed: -

The Chief Medical Officer at the Public Health Centre will be informed by either the G.P., Hospital or School.

The Chief Medical Officer will inform the School of the appropriate procedures to inform all Staff, Parents and Students.

The Public Health Centre will co-ordinate any treatment necessary and the School will co-operate fully.

Parents will be kept fully informed of all treatment and care necessary.

The School will advise parents; The Public Health Centre have a Helpline to give advice to parents during an outbreak of Meningitis or Tuberculosis.

11 Head Lice

Any incident of a student having head lice during school must be reported to Sister by any member of staff.

If a student is found to have head lice, all parents of children associated with that student will be sent a letter from the School and, if appropriate, the Boarding Staff making them aware there is Head Lice in the year group. It requests that they check their child's hair and treat accordingly

12 Automated External Defibrillator (AED)

An Automated External Defibrillator (AED) is used to treat someone who experiences sudden cardiac arrest. It is only to be applied to someone, who is unconscious, not breathing normally and showing no signs of circulation such as normal breathing, coughing or movement. The AED will analyse the heart rhythm and advise the operator if a shockable rhythm is detected. If a shockable rhythm is detected, the AED will charge to the appropriate energy level and deliver a shock.

Location of AED:

There are 5 AEDs located within the school buildings/grounds

1 outside the Medical Department in the Senior School

1 between the Sports Hall and Swimming Pool

1 in the Prep School Reception

2 outside, in secure cabinets. 1 on the cricket score board and one outside the Prep School, near the netball courts

All AEDs are registered with the East Midlands Ambulance Service.

Training in using an AED:

Designated staff will attend the necessary training sessions, achieving the required level of competence. They will attend refresher/updates sessions. The Medical Department will manage this.

Operating an AED:

There are lists displayed in school of the designated staff, both teaching & non-teaching, who have received training in operating an AED.

Maintenance of AED:

The AED is checked monthly by the Medical Department. Any servicing /replacements also arranged by them.

Reporting of Incidents:

Once the incident is over, an accident/incident form should be completed at the earliest opportunity. Completed forms should be submitted to the Health & Safety Officer.

13 First Aid Bags

First aid boxes are kept in all departments within school and are checked regularly and restocked by the Medical department.

First aid bags must be taken on all day and residential trips, including boarding trips other than local trips to Leicester or Thurmaston. A first Aid bag is kept in the minibus at all times.

14 Alternative/Chinese Medicines

As a multicultural school we respect and understand that there are different approaches to treating medical conditions.

If a student comes to school with an alternative/Chinese medicine, the duty sister will talk to the student and discuss the reason for them taking it and who has prescribed /supplied it.

All parents are requested to let the medical staff know of any medicines they are sending their child with. In the event of any medication not being able to be clarified, it will be discussed with the school's medical officer.

In the event of all parties being satisfied and in agreement, the medicine will be either stored in the medical department or if it is necessary, kept in the student's room, with them and the required staff, having understood and signed the Clinical Assessment for Patient Self Medication form.
